meet the perils of the campus head on.

Life on campus can be a real challenge, no matter how careful or smart you are with your laptop. So, we've included Toshiba EasyGuard® in each of our Tecra® and Portégé® laptops.

Be confident with Toshiba EasyGuard® Technology, featuring:

- » Spill Resistant Keyboard provides extra insulation delaying spill damage
- » Shock Absorbing Design protecting the screen and motherboard
- » Hard Disk Drive Protection with 3D sensor motion detection
- » ConfigFree® for secure and efficient wireless connectivity
- » Theft prevention features, such as a lock slot or Computrace® recovery service

maximize your investment.

By choosing Toshiba laptops, you gain exceptional performance and a lower total cost of ownership. Our exceptional reliability is demonstrated with low failure rates. We're so confident in our products, we even include a standard three-year warranty in our Tecra® and Portégé® laptops at no additional cost. Relax and compute with confidence. We've got you covered.

SystemGuard® accidental damage service.

Toshiba's SystemGuard® accidental damage service plan provides the financial security and peace of mind beyond our standard 3-year warranty. For accidental damages to your laptop, we'll repair or replace your laptop at no additional cost to you. And when you combine it with an Extended Service Plan, or On-Site repair, or ServiceExpress, you've virtually built a total protection for your machine. Talk to us, and we'll meet your specific needs.

accessories that earn high marks.

Toshiba accessories allow you to expand your 21st-century classroom even further, by adding power, versatility and protection—along with premium style and quality.

More importantly, our Tecra® and Portégé® laptops share common accessories, such as battery, AC adapter and port replicator, and make it easy on you to deploy and manage. Select accessories include:

- » AC Adapters
- » Extended-Capacity Batteries
- » High-Capacity External Hard Drives
- » Memory
- » Mice and Keyboard
- » Carrying Cases
- » Monitors
- » Notebook/Netbook Carts

budget-conscious programs.

Toshiba offers a variety of programs that can be tailored to your needs and help you maximize your education technology budget.

- Partner Leasing Options
- Trade-in Program
- Educational Pricing

green up the classroom.

All our products are EPEAT® Gold qualified, plus ENERGY STAR®, RoHS and WEEE compliant. And our strategic procurement meets strict standards for corporate social responsibility.

because today's education requires leading innovation.

Intelligent solutions that unleash your educational potential.

 - 15" diagonal screen at around 5 lbs
- » Thin and light design that not only looks cool but packs the performance and features you need
- » Durable and reliable laptops that endure everyday campus life
- » A standard three-year warranty in our Tecra and Portege laptops at no additional cost.
- » Competitive prices

ExploraVision

Since its inception in 1992, ExploraVision stands out as one of the nation's leading education programs that promotes student interest in science and technological innovation. To date, Toshiba has awarded more than one million dollars worth of savings bonds and prizes, including laptops to almost 250,000 students.

TOSHIBA

Toshiba Classic Scholarship

We are also proud to be celebrating the 13th year of the Toshiba Classic Scholarship. Through this important program, Toshiba has provided more than 134 laptops and \$299,000 to Orange County high school seniors. In 2011, we also awarded 12 finalists with a Toshiba laptop, Camileo camcorder, a back pack, plus other items like software. Additionally 2 of the finalists won a \$10,000 scholarship towards their college education.

Toshiba America Foundation

The Toshiba America Foundation (TAF), a non-profit, grant-making organization dedicated to supporting science and mathematics education in the United States, is another integral part of our philanthropic program. TAF supports quality science and math education by providing funds for projects designed by teachers to enhance instruction for students in grades K-12. Over the past 10 years, Toshiba has awarded more than \$189,000 in college scholarship funds through TAF.

discover Toshiba's smart innovations for education.

Long Battery Life

At Toshiba, we understand that longer battery life means higher productivity—in the classroom and at home. Our laptops are designed with some of the industry's highest battery life ratings, based on MobileMark® 2007 benchmark testing. All so you can go through your busy school day on a single charge. So go ahead, leave your AC adapter behind.

Thin and Light

Today, lugging books and a laptop around campus is the norm. But you want your backpack to be as light as possible. So we leveraged our laptop expertise to develop some of the thinnest and lightest full-performance laptops. Some of our Portege laptops weigh as little as three pounds and are as thin as just one inch.

Strong, Reliable, Durable

If thin and light isn't impressive enough, consider our laptop design and testing

process. True to our innovations heritage, we've developed some unique design features for a stronger, more reliable laptop. It's no wonder why we have some of the lowest failure rates in the industry.

Highly Accelerated Life Test (HALT)

To achieve the utmost in reliability, all Toshiba laptops undergo rigorous testing that looks beyond design. Such tests include stress, extreme temperature and random vibration.

Wireless Display

The Intel® Wireless Display* (WiDi), a feature built into select laptops, enables teachers and students to project assignments, online content or other learning materials wirelessly onto big screen TVs, electronic whiteboards or other classroom display devices—all in 1080p clarity. It's time to broaden your educational reach.

Leading Technologies

In addition to legendary quality, reliability and durability, Toshiba laptops use the latest and greatest components and technologies, such as:

- » Second-generation Intel® Core™ processors
- » Newest-generation Intel® wireless Wi-Fi® 802.11
- » High-density PCB architecture
- » Honeycomb structure
- » Fiberglass reinforced casing
- » Magnesium alloy casing
- » High-capacity battery
- » CPU airflow cooling
