1. Operation is not guaranteed on all PCs.

2. To run USB 2.0, a USB 2.0 interface must be pre-installed on the computer or added as a system expansion. The gigabeat functions as a USB 1.1 device when connected to a USB 1.1 interface.

Installing Windows Media® Player

To transfer music files to the gigabeat, use Windows Media® Player 11 or 10. If Windows Media® Player 11 or 10 is not installed on your computer, follow these instructions to install it from the CD-ROM that shipped with your gigabeat.

- 1 Insert the CD-ROM into your computer.
- 2 Click **Install Windows Media Player 10/11**.
- 3 Follow the on screen instructions.

Windows Media® Player 11 or 10 will be installed depending on your PC's operating system. (If you are using Windows® XP SP2 or later, or Windows® XP Media Center Edition 2005 Rollup 2 or later, Windows Media® Player 11 will be installed. If your operating system is older than those, Windows Media® Player 10 will be installed.) If you already have Windows Media® Player 10 installed on your computer, follow the steps below to install the required patch (modification program).

Please note that when installing Windows Media® Player 10 from the supplied CD-ROM, the required patch (modification program) will be installed.

- 1 If you are using Windows Media® Player version 10.00.00.3802 or earlier, use “Windows® Update” on your computer to upgrade to the latest version of Windows Media® Player 10.
- 2 Download the Windows Media® 10-KB902344-x86-INTL.exe program from the Microsoft® website (<http://support.microsoft.com/kb/902344/en-us>) and run it to install the patch.
- 3 Download the Windows Media® 10-KB895316-x86-ENU.exe program from the Microsoft® website (<http://support.microsoft.com/kb/895316/en-us>) and run it to install the patch.

Charging/connecting to a computer

To charge the gigabeat, connect it to your computer via the USB port. If you have Windows Media® Player 11 or 10 installed on your computer, the gigabeat connects using a method called Media Transfer Protocol (MTP), which supports the Windows Media® DRM10 data transfer.

- 1 Check to see that the AC adapter is powering the computer.
- 2 Connect the gigabeat to your computer using the bundled USB cable.
- 3 Turn on the computer. You can also turn on the computer before connecting the gigabeat if you prefer.

NOTE

You can connect the gigabeat without turning it on.

(Sample Illustration) Connecting the gigabeat to the computer using the USB cable

When you connect the gigabeat to the computer, “USB Connected” and the charging status icon will appear on the gigabeat screen. The charging status icon will turn green when charging is completed.

NOTE

It takes approximately 2 hours to fully charge the gigabeat.

NOTE

The first time you establish the MTP connection, a screen appears in which you select the operation to be performed when the gigabeat is connected to the computer. Unless you want to transfer music right away, simply click **Cancel**. For information on transferring music, see “Transferring Music Files to the gigabeat” on page 12.

Charging through the USB connection is dependent on the performance of the computer’s USB bus power supply function. For this reason, some computers may not be able to charge the gigabeat. When you establish a USB connection with a computer that does not support charging, the connection may drop out quickly so that the computer’s USB functions are temporarily unavailable. If this happens, disconnect the gigabeat and restart the computer.

The internal battery should be charged within the temperature range for normal use (5°C to 35°C/41°F to 95°F). If the temperature is outside this range the gigabeat may not be charged properly. As the remaining battery power drops, the battery level display on the gigabeat screen changes. Recharge the gigabeat when the remaining battery power becomes low.

The gigabeat may take some time to connect to the computer if large amounts of data are stored on the gigabeat.

You cannot use the gigabeat when “USB Connected” is displayed.

Disconnecting the gigabeat from the computer

To disconnect the gigabeat from the computer:

- 1 Unplug the USB cable from the computer.

CAUTION

Do not disconnect the gigabeat from the computer if “Do not Disconnect” is displayed on the gigabeat screen.

Turning the gigabeat On and Off

To turn the gigabeat on:

- 1 Slide the POWER switch towards [POWER] and release.

(Sample Illustration) gigabeat buttons and ports

To turn the gigabeat off:

- 1 Slide the POWER switch towards [POWER] and hold it there for at least 1 second before releasing it.

NOTE

The gigabeat may take some time to start up if it contains a large amount of data.

The arbitration will be conducted before a single arbitrator, and will be limited solely to the Dispute between Customer and Toshiba. The arbitration, or any portion of it, will not be consolidated with any other arbitration and will not be conducted on a class-wide or class action basis. If Customer prevails in the arbitration of any Dispute with Toshiba, Toshiba will reimburse Customer for any fees Customer actually paid to NAF in connection with the arbitration. Any decision or award of the arbitrator rendered in such arbitration proceeding shall be final and binding on each of the parties, and may be entered as a judgment in any court of competent jurisdiction.
